ADVISORY ACTION

An appeal under 37 CFR 1.191 was filed in this application on 10-15-2003. Appellant's

brief must be filed within the time period set forth in 37 CFR 1.192(a).

The amendment filed 8-13-2003 under 37 CFR 1.116 in reply to the final rejection has

been considered but is not deemed to place the application in condition for allowance and will

not be entered because:

The proposed amendment raises new issues that would require further consideration

and/or search. For instance, the proposed amendment to claim 9 minimally raises issues

under 35 U.S.C. 112, first and second paragraphs.

Since applicant's arguments are predicated on an amendment not of record, all objects and

rejections are maintained for reasons of record. Said objections and rejections are reiterated

below.

Objections Maintained

The objection to the specification for failing to properly label the Brief Description of

Drawings section is maintained for reasons of record.

Claim Rejections Maintained

35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 1645

The rejection of claims 1-9 under 35 U.S.C. 112, second paragraph, as failing to include essential steps is maintained for reasons of record. It is still unclear what steps are involved in "allowing the virus to propagate".

The rejection of claims 1-9 under 35 U.S.C. 112, second paragraph, as being rendered vague and indefinite by the use of the term "which are immortalized" is maintained for reasons of record. It is still unclear whether Applicant is referring to the cells **and** their progeny or merely the progeny.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out

Application/Control Number: 09/892,612 Page 4

the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

The rejection of claim 9 under 35 U.S.C. 102(b) as being anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Brugh et al. (Avian Diseases, Vol. 28, No. 1, 1984, pages 168-178) is maintained for reasons of record.

Since claim 9 is drawn to a virus, not a virus preparation, the instant claim reads on any virus. Hence, the disclosure by Brugh et al. anticipates the limitations of the rejected claim.

Conclusion

No claim is allowed.
